

City apartment with many suburban features

Designed by: Clara Kodela

Software: Autodesk Revit 2019 Student Version.

Completed: June 15th 2019

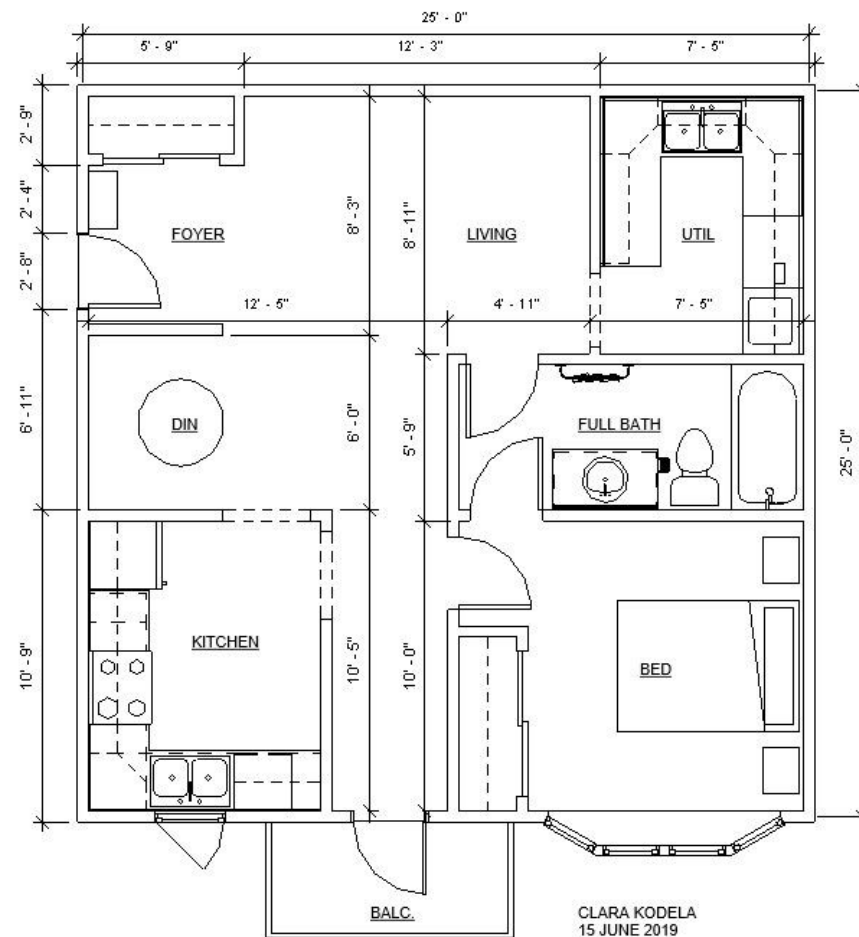

This is a relatively small one-bedroom apartment with a large utility and laundry room, as well as a decent sized kitchen.

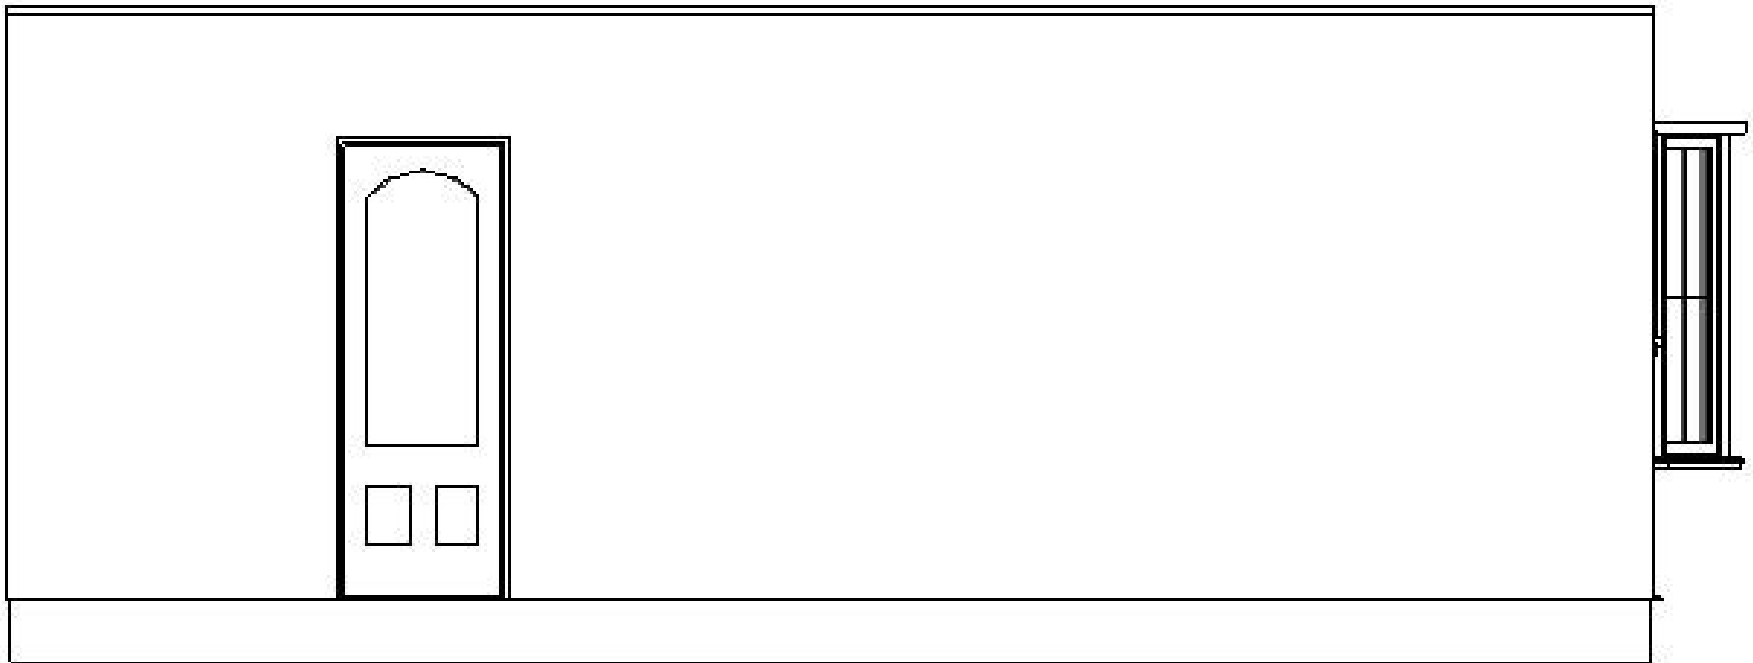

It has a balcony and a dining room as well as a living area just in front of the foyer.

It's only 500 square feet, because I wanted to see if I could implement all of the amenities of a typical suburban house into a more compact space that would allow it to be placed in a city.
